

Roundcube

Voici quelques notes de personnalisation du site Roundcube incluant la mise en place du support d'un annuaire LDAP. Donc après avoir suivi les étapes d'installation de Roundcube, vous pouvez ajuster quelques paramètres.

`mod-php` doit être activé

```
sudo nano /etc/php5/apache2/php.ini
```

Remplacer la ligne :

```
;date.timezone = par date.timezone = America/Toronto
```

et éditer le fichier `.htaccess` du site de Roundcube

```
php_value date.timezone America/Toronto
```

Pour réactiver l'installateur :

Éditer `RCUBE_CONFIG_DIR/main.inc.php`

```
$rcmail_config['enable_installer'] = true;
```

Annuaire LDAP

Pour avoir accès à l'annuaire LDAP, il faut ajouter les éléments suivants dans `config_inc.php` du site web:

```
//-----
```

```

// LDAP
//-----

$rcmail_config['ldap_public']['ldap Lafontaine-Barrette'] = array('hosts' =>
